

COURSE BROCHURE

Planning & Scheduling

for Maintenance Managers

The Planning & Scheduling for Maintenance Managers course gives maintenance leaders the tools to build and sustain a more effective planning and scheduling process.

BUILT FOR

Maintenance Managers & Supervisors

Planners & Schedulers

Maintenance & Reliability Engineers

Maintenance & Engineering Managers

ON-SITE INSTRUCTION · PRACTICAL APPLICATION · REAL-WORLD EXAMPLES

PLANNING & SCHEDULING THAT WORKS

Build a Better Planning & Scheduling Process

Effective planning and scheduling takes more than putting work on a calendar. Learn what good looks like, how the process should work, and what each role needs to do to improve maintenance execution.

YOU'LL LEARN

01

Roles & Responsibilities

How staffing and responsibilities differ across planning and scheduling roles.

02

Core Processes

The processes and tools behind effective planning and scheduling.

03

Job Planning

Best practices for checklists, job plans, and PM optimization.

04

Program Development

How to start or reengineer a planning and scheduling program.

05

Backlog Management

Methods for managing maintenance backlog more effectively.

06

Precision Maintenance

The role and benefits of precision maintenance.

07

Better Job Plans

What a best-practice job plan should include.

08

Job Plan Libraries

How to build and maintain effective job plan libraries.

09

Sustainable Change

Change management practices that support long-term success.

PRACTICAL. INTERACTIVE. APPLICABLE.

Take the Learning Back to Your Facility

This two-day workshop combines real-world examples, activities, simulations, and practical exercises to help participants connect planning and scheduling principles directly to their work.

Bring the Course On-Site

Train your team together at your facility and apply the material to the processes and challenges they encounter every day.

Make It Relevant

With permission, examples from your facility can be incorporated into the workshop to make the learning more directly applicable.

Built for Application

The course is designed to give participants enough depth to understand and improve the process —without overwhelming them with information they won't use in their current roles.
